

Drug, Device, & Vaccine Development Services ♦ GLP & non-GLP ♦ Vivarium Services

Service Spotlight – GLP Toxicology Services

Toxicology studies are required to determine the adverse effects of drug candidates and the effect of dosage on toxicity. To assess toxicity, Noble offers a wide range of GLP and non-GLP toxicology services.

- Exploratory Toxicology
- General Toxicology
- Immunotoxicology and Immunogenicity
- Development and Reproductive Toxicology
- Toxicokinetics

With extensive experience in vaccine and drug development, Noble Life Sciences staff is dedicated to helping you complete your project in a timely and efficient manner. In addition to GLP toxicology services, Noble Life Sciences provides all aspects of the GLP process from design to regulatory support of your IND, IDE or PMA FDA submission. [Learn More](#)

Our Facilities ...

- USDA Licensed
- OLAW Compliant
- FDA Inspected

In Vivo Options ...

- Mouse
- Rat & cotton rat
- Ferret
- Guinea pig
- Hamster
- Rabbit
- Sheep
- Goat
- Swine
- Mini Pigs

Site Consolidation to Streamline Operations and Assure Quality

The moving vans are gone. All the boxes have been unpacked. The instruments and equipment have been moved, set up and checked. And we have all settled into our offices and labs.

The move was motivated by a desire to consolidate our activities at one site, and thereby streamline operations following our acquisition of Spring Valley Laboratories.

To accomplish our goal, we opted to close the Noble facility in Gaithersburg, Maryland and move operations to the Spring Valley Laboratories' site in Sykesville, Maryland.

With the consolidation of our facilities complete, we have made a significant step towards fully integrating Spring Valley Laboratories into Noble. What can you expect? Quality assurance, responsiveness, and efficiency to meet your needs whether you are developing a medical device, new pharmaceutical or vaccine. [Learn More](#)

About Noble Life Sciences

Noble Life Sciences is a full-service pre-clinical contract research organization offering GLP and non-GLP services for the development of drugs, vaccines, and medical devices. From proof-of-concept studies to preclinical safety and efficacy studies, Noble Life Sciences has a wide range of services to meet your needs. For more information about Noble Life Sciences, visit
